

## THE PHASE TECHNOLOGY OCTAVE SERIES POWERED SUBWOOFERS

The Octave Series of powered subwoofers deliver the deep, floor-shaking bass that brings added realism to music or movie soundtracks. Complete with their own built-in power amplifiers, the Octave Series subwoofers eliminate the need for a separate subwoofer receiver channel or an extra power amplifier. And each model in the series can create the added dimension that only true, deep-bass response can offer. For convenience, auto-on circuitry activates the subwoofer's amplifier when you turn your system on and deactivates it when you turn your system off.

Volume-level controls, variable crossover points and a phase switch allow any model in the Octave Series to mate precisely and seamlessly with virtually any main speakers in your home-entertainment system.

And the attractive appearance of the Octave Series subwoofers allow them to blend in beautifully as part of any home decor.

### OCTAVE 1.0

The flagship of the series, the Octave 1.0 incorporates a 15-inch cone driver constructed of advanced mineral-filled polypropylene to deliver clean, powerful bass response to the lowest audible frequencies. Its built-in servo power amplifier delivers a potent 240 continuous watts and a remarkable 800 watts during peak demands. Available in a black cabinet with solid cherry, oak or black-grain hardwood tops.

### POWER 12

Combining a 12-inch, long-throw driver and a precisely aligned bass-reflex cabinet with a front-firing port, the Octave Series Power 12 subwoofer reaches deep down to deliver powerful, tightly controlled bass. It packs plenty of power, too, with an internal servo power amplifier that delivers 125 continuous watts and 250 peak watts. Available in a black cabinet with solid cherry, oak or black-grain hardwood tops.

### POWER 10

Outstanding performance plus solid value makes the Power 10 an ideal choice for a wide range of home-entertainment systems. A 100-continuous-watt built-in servo power amplifier (200 watts peak) powers a 10-inch, long-throw driver for truly awesome bass muscle. And a bass-reflex cabinet with front-firing port adds efficiency as well as bass extension. Available in a black wood-grain finish.

#### OCTAVE 1.0 SPECIFICATIONS

FREQUENCY RESPONSE: 18-100 Hz  
 PHASE: 0°/180° User Adjustable  
 CROSSOVER SLOPE: 24 dB/Octave, High-Pass/Low-Pass  
 INPUTS:  
 Low Level (Preamplifier)  
 High Level (Speaker/Amplifier)  
 OUTPUTS:  
 Low Level  
 DIMENSIONS: 20-3/4"H x 18"W x 20"D

#### POWER 12 SPECIFICATIONS

FREQUENCY RESPONSE: 28-180 Hz  
 PHASE: 0°/180° User Adjustable  
 CROSSOVER SLOPE: 18 dB/Octave Variable Low-Pass,  
 6 dB/Octave High-Pass  
 INPUTS:  
 Low Level (Preamplifier)  
 High Level (Speaker/Amplifier)  
 OUTPUTS:  
 High Level  
 DIMENSIONS: 19"H x 16-1/2"W x 17-3/4"D

#### POWER 10 SPECIFICATIONS

FREQUENCY RESPONSE: 35-180 Hz  
 PHASE: 0°/180° User Adjustable  
 CROSSOVER SLOPE: 18 dB/Octave Variable Low-Pass,  
 6 dB/Octave High-Pass  
 INPUTS:  
 Low Level (Preamplifier)  
 High Level (Speaker/Amplifier)  
 OUTPUTS:  
 High Level  
 DIMENSIONS: 15-3/4"H x 14-1/2"W x 14-7/8"D
