The Teatro Series Home-Entertainment Speaker System

FOR SOUND YOU CAN ALMOST SEE... In a word that recalls the great entertainment stages around the world — *teatro* means theater in the Romance Languages — the new Teatro Series from Phase Technology extends your home-entertainment options in exciting new ways.

With seven basic components, from main speakers to surround and center-channel models, you can assemble the system that meets your needs — and expand it over time, as well. From a basic two-channel stereo presentation to the thundering presence of a full multi-channel digital theater system, the choices are yours with the Teatro Series.

Whether upgrading your existing system or investing in a totally new home theater, let the new Teatro Series meet your needs. For movies, music and more, this is a system that will solve your home-entertainment options now and in the future.

Teatro Tower 10 **NEW**

Introducing the new flagship of the Teatro Series. The Tower 10 combines stunning good looks with an elegant, floor-standing speaker (only 40.25" tall) that incorporates an integrated 75-watt powered subwoofer in each cabinet.

Designed as the main speakers for every home-entertainment configuration, the Teatro Tower 10 features left- and right-firing subs (marked on each carton) for ideal reproduction of every source. Their extended frequency response and high sensitivity make them particularly ideal as the centerpiece of your home theater.

Each Teatro Tower 10 cabinet is fabric wrapped and comes with a piano-black high-gloss top. The units are front ported for added sonic impact and fully shielded to eliminate video distortion.
