

VELOCITY

Experience the next generation of high fidelity speaker performance with Phase Technology's **Velocity** series. This entirely new series includes varieties of floorstanding, bookshelf, and surround speakers, as well as powered subwoofers. Named for its streamlined and stylish exteriors, and mind-bending accurate performance, **Velocity** is the next innovation in home entertainment.

One look at Velocity and it's clear: Phase Technology has redefined the standards for speaker engineering, with redesigned drivers you have to hear to believe, inside cabinets shaped as finely as their sound. With metal grilles that can be painted any color and two available finishes – warm Sun Maple and contemporary Black Rosewood – Velocity offers complete decorative versatility. But the look isn't all that's new about Velocity...

The patented **Soft Dome Tweeter** gives Velocity its silky-smooth and defined high frequencies. Invented by Phase Technology and utilized around the globe, the soft dome is peerless, and is the perfect complement to the **VDT™ Vapor Deposited Titanium Woofer**. Starting with injection-molded polypropylene cones, a process called vapor deposition forms an ultra-light layer of titanium on the driver's surface. This layer helps produce an exceptionally smooth and extended mid range, not to mention a driver that looks as dazzling as it sounds.

The one-piece Uniframe speaker basket/baffle assembly forms the surface layer of a rigid, three-part platform that essentially eliminates the transmission of vibration. It combines the woofer basket with a mid-section of dense, highly damped, viscous foam, and a base layer of MDF for a level of clarity unlike anything you've heard before. Velocity's towers offer enhanced detail with bi-wireable drivers, and include floor spikes. The V-Surround rear effects speakers are operable as either bipolar or dipolar to precisely define the best soundstage for a room. And every speaker cabinet is computer-analyzed to further reduce unwanted vibration through heavy bracing and varying wall thickness.

One of Phase Technology's most distinct signature features is the **Absolute Phase™ Crossover**, a processing technology that gives listeners the same soundstage no matter where they sit. Even with speakers at different heights and varied listening positions throughout a room, all movie soundtracks or music selections maintain total clarity, imaging accuracy, and even tonal balance. And our **Low Level Linearity** guarantees the treble and bass won't lose definition or proportion, even at background volumes.

All speakers in the Velocity series – and the entire Phase Technology collection – are covered by our **10-Year Warranty** (see warranty for details).

home theater

V-12 GRAND HOME THEATER SYSTEM

The beauty of Velocity – all Phase Technology’s collections, in fact – is that any of the system’s speakers can be combined to create a virtually endless number of systems, each sounding like it was tailored for your specific use. Whether putting together the ultimate home theater that makes a sonic and decorative statement, or a solid, high fidelity music package that seamlessly integrates with today’s interior designs, Velocity offers the perfect combination. Here are a few system suggestions to consider...

V-12 GRAND HOME THEATER SYSTEM

2 x V-12 (Front) 1 x V-6 (Center) 2 x V-Surround (Rear)
1 x HV-1200 (Subwoofer)

The V-12 System consists of two 3-way V-12 towers at the left and right front channels, uses the versatile V-6 multi-purpose bookshelf for the center channel, and two bipolar/dipolar, wall-mountable V-Surrounds to complete a broad and spacious soundstage. Adding the HV-1200 12" subwoofer means everyone in the room will not only hear the deepest frequencies but feel the excitement bass adds to any soundtrack. This system will satisfy any dedicated movie and music fan who wants to fill even the largest entertainment room with sound that rivals the finest movie theaters or concert halls.

V-10 PREMIERE SYSTEM

2 x V-10 (Front) 1 x V-6 (Center) 2 x V-Surround (Rear)
1 x HV-1000 (Subwoofer)

The V-10 System boasts a pair of 2-way V-10 towers at front and the HV-1000’s huge 10" sub driver to reproduce unparalleled audio detail. With the V-6 as center, and a pair of V-Surrounds, this system will integrate perfectly into your large family room, framing any video display in elegance, and enhancing your existing décor.

V-8 BOOKSHELF SYSTEM

2 x V-8 (Front) 1 x V-6 (Center) 2 x V-Surround (Rear) 1 x HV-1000 (Subwoofer)

The V-8 System takes advantage of two V-8 front channel bookshelf speakers and the V-6 center speaker. Including two V-Surrounds, every wide-range speaker in this system offers far-reaching options for positioning. With bass grounded in the rock-solid HV-1000, the V-8 system produces sound levels that will fill your large entertainment room with unyielding audio performance in a highly flexible design.

V-4 COMPACT SYSTEM

2 x V-4 (Front) 1 x V-6 (Center) 2 x V-4 (Rear) 1 x HV-800 (Subwoofer)

With V-4 bookshelves at the front and surround channels, the multi-purpose V-6 at center, and the workhorse HV-800 subwoofer, the V-4 takes dynamic sound almost anywhere you want crystal-clear audio. But don’t mistake the V-4’s huge range of application—this system will make you look twice to be sure that stunning sound really is coming from these speakers and nowhere else.

V-4 COMPACT SYSTEM

High-Velocity Subwoofer Series

High Velocity Subwoofers feature mica/graphite polypropylene drivers, which are extremely rigid yet light enough to produce extremely responsive and accurate, floorshaking bass. Each sub’s front-mounted driver has a butyl rubber surround, and a powerful 250-watt servo-controlled amplifier that monitors and adjusts output for dynamic, undistorted bass. Each also features gain control, phase switch, variable crossover (40-110Hz), line/speaker level inputs, a separate LFE input, and video-shielding.

HV-1200 POWERED SUBWOOFER

12" driver, 250-watt servo-controlled amplifier
Frequency response:
24 Hz–110 ± 3 dB
Dimensions:
14" (W) x 19.5" (H) x 18.25" (D)
Weight: 38 lbs. **Video-shielded**
Finish: Black Rosewood

HV-800 POWERED SUBWOOFER

8" driver, 250-watt servo-controlled amplifier
Frequency response:
32 Hz–110 ± 3 dB
Dimensions:
10.75" (W) x 15.25" (H) x 13" (D)
Weight: 22 lbs. **Video-shielded**
Finish: Black Rosewood

HV-1000 POWERED SUBWOOFER

10" driver, 250-watt servo-controlled amplifier
Frequency response:
29 Hz–110 ± 3 dB
Dimensions:
11.75" (W) x 17" (H) x 16" (D)
Weight: 28 lbs. **Video-shielded**
Finish: Black Rosewood

VELOCITY line-up

V-12

3-way Tower using dual 7" VDT™ woofers with butyl rubber surrounds, and a 1" soft dome tweeter for the deepest and fullest sound in the series, and a stunning design for a striking aural and visual statement.

Frequency Response: 32 Hz - 20 kHz ± 3 dB
Sensitivity: 92 dB
Impedance: 8 ohms
Dimensions: 8.5" (W) x 44.5" (H) x 12" (D)
Weight: 40 lbs each
Video-shielded
Finishes: Sun Maple, Black Rosewood

V-10

2-way Tower using a 7" VDT™ woofer with butyl rubber surround, and 1" soft dome tweeter for impressive sound and outstanding looks that create a solid foundation for your home entertainment system.

Frequency Response: 35 Hz - 20 kHz ± 3 dB
Sensitivity: 90 dB
Impedance: 8 ohms
Dimensions: 8.5" (W) x 40.5" (H) x 12" (D)
Weight: 36 lbs each
Video-shielded
Finishes: Sun Maple, Black Rosewood

V-8

2-way Bookshelf Monitor with 7" VDT™ woofer with butyl rubber surround, and 1" soft dome tweeter, puts Velocity's sharp detail and room-filling sound where towers can't go.

Frequency Response: 44 Hz - 20 kHz ± 3 dB
Sensitivity: 90 dB **Impedance:** 8 ohms
Dimensions: 8.5" (W) x 17.5" (H) x 11.5" (D)
Weight: 18 lbs each **Video-shielded**
Finishes: Sun Maple, Black Rosewood

V-6

2-way Multi-purpose with 5-1/4" VDT™ woofer, 5-1/4" VDT™ bass radiator with butyl rubber surrounds, and 1" soft dome tweeter, adds positioning flexibility with a design that looks and sounds great standing up or resting on its side.

Frequency Response: 56 Hz - 20 kHz ± 3 dB
Sensitivity: 90 dB **Impedance:** 8 ohms
Dimensions: 7" (W) x 18" (H) x 8.75" (D)
Weight: 12 lbs each
Video-shielded **Finishes:** Sun Maple, Black Rosewood

V-4

2-way Compact Bookshelf, 5-1/4" VDT™ woofer with butyl rubber surround, and 1" soft dome tweeter, puts eye-opening sound and clarity where space is most limited.

Frequency Response: 58 Hz - 20 kHz ± 3 dB
Sensitivity: 90 dB
Impedance: 8 ohms
Dimensions: 7" (W) x 11" (H) x 9.25" (D)
Weight: 9 lbs each
Video-shielded
Finishes: Sun Maple, Black Rosewood

V-Surround

2-way bipolar/dipolar selectable surround effects speaker with 5-1/4" VDT™ woofer with butyl rubber surround, and dual 1" soft dome tweeter wall mounts for total rear effects versatility.

Frequency Response: 70 Hz - 20 kHz ± 3 dB **Sensitivity:** 90 dB
Impedance: 8 ohms **Dimensions:** 11.75" (W) x 9" (H) x 4.75" (D)
Weight: 10 lbs each **Finishes:** Matte White, Matte Black
